# Larisa Turetskaia

lturetskaja@gmail.com | teapod.dev | github.com/lturetskaia | +44 7833200670

## Education

**Goldsmiths, University of London** — London, UK
*BSc Computer Science* — *April, 2024 – Present*

**Financial University under the Government of the Russian Federation** — Moscow, Russia
*BSc Economics (Banking and Financial Markets)* — *Sep. 2016 – Sep. 2019*

## Technical Skills

**Languages**: JavaScript, Typescript, HTML, CSS, C++, Python, SQL

**Frameworks and libraries**: React, React Router, Redux, Express.js, Bootstrap, Tailwind CSS, P5.js

**Other:**: MySQL, MongoDB, Node.js, Git, VS Code, DigitalOcean Cloud, Nginx, Linux

## Projects

**TechTalk Event Management Platform** — https://teapod.dev/event-manager/

- Engineered a full-stack event management platform using Typescript, React Router, Node.js and Express.js, and implemented secure, role-based workflows for seamless event creation and booking management.
- Secured user authorisation and authentication utilising bcrypt password hashing, protected API endpoints and role-based access control.
- Managed the end-to-end software development lifecycle from system design to production deployment on a DigitalOcean Ubuntu Droplet, integrating a MySQL database and configuring an Nginx reverse proxy.

**OtoDecks DJ application**

- Designed and developed a feature-rich desktop music mixing application with a custom graphical user interface using C++ and JUCE library.
- Implemented advanced audio features including hot cues, a loop sampler and real-time audio recording from active tracks and microphone input.
- Developed a beat per minute (BPM) calculation algorithm leveraging Fast Fourier Transform(FFT) and Spectral Flux functions, achieving 95% detection accuracy for tracks ranging between 60-140 BPM.

**E-commerce Web Application** — https://willowy-dieffenbachia-cac658.netlify.app/

- Built a fully responsive e-commerce website utilising TypeScript, React and React Router to provide smooth navigation and multi-page feel.
- Integrated Redux Toolkit for centralised global state management and utilised browser local storage to ensure persistent user cart items across sessions.

**2D Side Scrolling Game** — https://teapod.dev/side-scroller/

- Engineered a multilevel side scrolling game using P5.js and P5.Sound libraries, creating custom graphics and animations with the Canvas API.
- Implemented complex game logic, including collision detection and score tracking, to to deliver engaging user experience.
